

You are invited to the next

New England Visions 2030 Institute Forum

The Changing Face of New England No. 3

The Solar Revolution

Wednesday 6th March 2024

Armidale Bowling Club

5.30 – 7.30 pm

All questions from the floor

Australian researchers were among the first to realise the potential of solar power in providing renewable energy to our nation. Over the past 15 years rooftop solar has emerged as a leader in the Australian energy industry with approximately 30% of homes being fitted with solar panels. Large scale solar farms, the rising agrivoltaics industry and batteries are all contributing to our future renewable energy needs as we seek to reduce emissions and universally electrify across our nation. We invited a panel of experts to answer your questions.

Panel

Ed Campbell, Director of Business Development Meralli Solar

Topic: Large scale solar

Prof. David Lamb - Deputy CEO and Chief Scientist - Food Agility CRC

Topic: Agrivoltaics

Peter Kemp - New England Solar Power

Topic: Rooftop Solar and Battery Installation

Everyone interested is invited.

A donation of \$5.00 by online ticket or at the door is requested.

Registration: You can either register by purchasing a ticket at

<https://www.trybooking.com/COWWL>

or send us an RSVP to newenglandvisions2030@gmail.com

NEV2030 Institute is a completely independent non-profit organisation.

The requested donation is our only source of funding apart from in-kind support from the Bowlo. We use our funds to cover any event or speaker expenses.

We have extended the time of our Forums to 7.30 pm to allow for a longer question period. Those wishing to stay for dinner in the Bistro from 6.45 pm should make a booking with the club.

Organisers: The Team, New England Visions 2030 Institute
